

## COLOURLOCK LEATHER CLEANER

### Introduction:

Colourlock Leather Cleaner is extremely efficient, easy to use leather cleaner containing pure synthetic cleaning and moisturising agents.

This product is **excellent for removing soiling, stains and spillages**. With regular use it also aids in the prevention of the build up of sweat and body oils on top coated and finished leathers.

Colourlock Leather Cleaner has been independently tested by the Leather & Shoe Research Association of New Zealand (LASRA), and obtained a 100% pass for wet and dry rub testing for cleaners used on top-coated leathers.

### Application:

Colourlock Leather Cleaner is applied to the top-coated leather with a soft cloth or a sponge. Using a circular motion, work on small sections of the article to be cleaned. As the cloth gets dirty, use a clean portion of cloth/sponge so that soiling is removed and not spread.

If grime and dirt has been trapped in cracks, it can be effectively removed by using a soft bristled leather cleaning brush (available from Colourlock Leathercare Ltd, see website).

### Features:

- Easy to use, one step, wipe over product.
- High foaming which assists in the lifting of grime and dirt.
- Correct use will not damage top-coated leathers.
- Chemically neutral and biodegradable.
- Pleasant clean smell.

Note: Colourlock Leather Cleaner is not suitable for use on suede or nubuk.

**Pack Size:** 200 ml. and 375 ml. bottles.

For seriously cracked or damaged leather requiring professional attention, we recommend the services of European Leathercare (NZ) Ltd. phone 0800 835 641.
